

Inference Clues

Inference Clues is a game-based reading comprehension app designed to build inference skills; it is designed for students who can decode but have difficulty understanding. Students read a short paragraph, then determine the “clue words” leading to a specific guess or inference. Additional cues are provided as needed. Levels are gradually increased.

The basic "Inference Clues" app has 4 free levels for a single player. Remaining levels and additional players are unlocked by in-app purchases.

Our 'Inference Clues: School Edition' app costs \$5.99 and includes all levels and up to 10 players. This app has no in-app purchases.
