

# Math Word

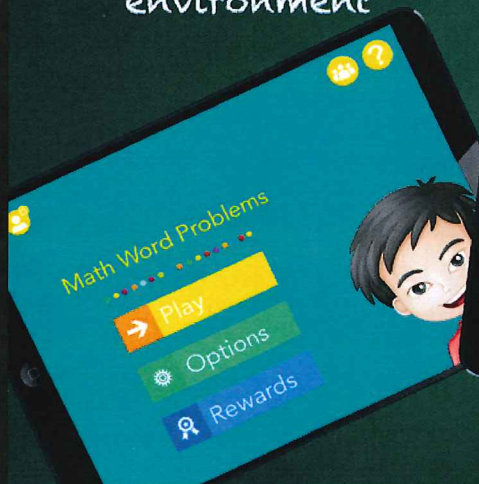

## Math Word Problems - Step by Step

By Janine Toole

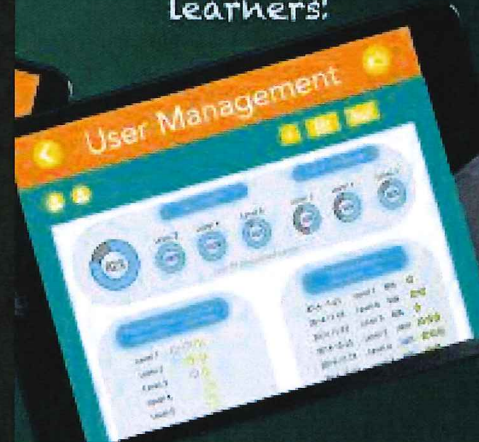

Math Word Problems is targeted to children in Grades 2-5 who struggle with understanding math word problems and how to do them.

Each level in Math Word Problems targets a specific step in working through a math word problem. Once proficient, these skills are combined as your child works through complete problems. Skill development steps are incremental and focus on attaining success. A must-have for kids struggling with math word problems.

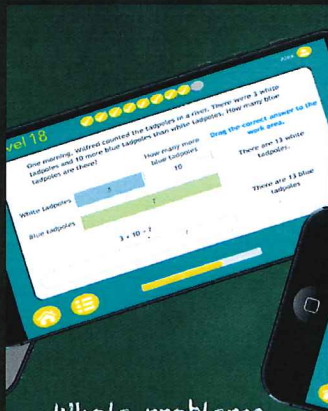

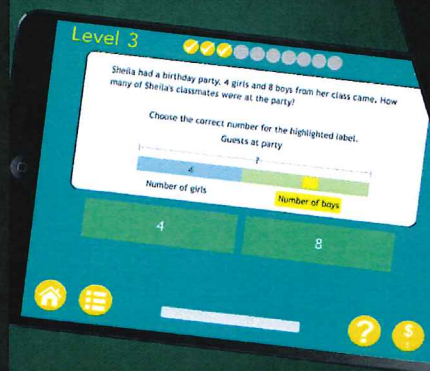

Builds understanding of math word problems in a fun, game-like environment

Extensive reporting meets the needs of teachers/therapists -our apps suit all learners!

Each step is practiced individually.

Whole problems are worked through step-by-step. Timers ensure fluency.
